

**Your money is secure, no matter what currency you accept,
when you use the most up-to-date currency authentication technology from JCM Global.**

JCM's UBC multi-currency counterfeit detector is compact for countertop use and simple to operate. You are in control and the fraudsters will be detected.

NEW

Multi-Currency Counterfeit Detector **UBC-10**

Introducing the next generation in counterfeit detection, a result of JCM Global's 20 years of experience in the bill validation industry. The UBC-10® multi-currency detector, can continuously process a stack of 30 banknotes using one of the worlds most sophisticated detection packages.

- Counterfeit detection of multi-currency
- Continuous processing of 30 banknotes
- Compact design

Available currencies

US dollar	Euro**
Chinese Yuan**	1Other currency**

**OPTION

UBC-10

Is equipped with various features that provide a full solution for foreign exchange service, providing secure currency transactions.

Features

World's highest security level verification

Advanced JCM Sensor technology provides the highest recognition for increasingly complicated and sophisticated counterfeit banknotes.

Multi-currency detection

New centering technology can handle different currency note sizes and width. The UBC-10 comes with US dollar detection as the standard software and you have the option to add up to 3 other currencies.

Bulk note insertion, up to 30 banknotes

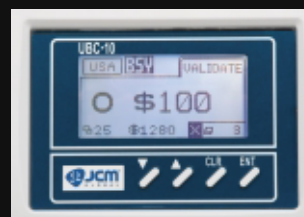

You don't need to feed banknotes one-by-one. The UBC-10 accepts and feeds a bulk-note stack of up to 30 bills automatically. UBC-10 software accepts banknotes in 4-directions.

Small footprint and Modern design

You can place and operate UBC on small bank teller or exchange counter, providing a full view of the operation to clients. The site of UBC could work to dissuade to-be-fraudsters from trying your business as a target.

Software Update by SD card

Updates are easily and securely accomplished and quickly provide your business with the latest detection capabilities.

Verification Result and Total amount are indicated on the panel.

Suspected note goes to lower tray, so the machine operation is not disturbed.

UBC-10 specification

Product number	UBC-10
Available currency	US dollar, Euro, Chinese Yuan, Other 1 currency
